

Future-Proof Your Network: Be 5G-Ready and Beyond with MX-SPC3 Security Services Card

Mobile network traffic doubles every 18 to 24 months. With 5G on its way and the continued rise of IoT and multicloud, even more throughput and connection scale will be required. Rather than letting legacy appliances become the new bottleneck in your network, what you need is a modern, scalable approach that allows you to pay as you grow.

Modernize and maximize return from your existing MX Series Platforms
By simply adding the MX-SPC3 Security Services Card to your existing MX series platforms, you can:

MODERNIZE

Maximize the potential for scale and performance for services such as CGNAT and stateful firewall to meet the stringent requirements of 5G, IoT and multicloud.

MITIGATE

Counter threats with advanced security capabilities such as intrusion detection, DNS sinkhole, and URL filtering.

MONETIZE

Get greater value out of your existing MX Series platforms and enjoy powerful security without compromise on any performance, scale or agility.

Get more from what you already have.
