Making every constituent and agency connection count

Deliver the fastest feature rollouts and exceptional threat detection

Juniper delivers seamless government networking solutions

Learn how →

Government networking

Assure seamless, secure connectivity

Juniper's AI-Native Networking Platform empowers seamless networking and operations for government agencies by enabling connected, experience-first constituent services, automating agency IT operations, and unifying comprehensive government network protection.

Why AI-Native Networking?

The benefits of AI-Native Networking in government

The industry's first and only AI-Native Networking Platform from Juniper offers government agencies proven benefits in networking connectivity, automation, and cybersecurity.

- **Enables experience-first constituent services with end-to-end assurance across the full stack**

  Foster constituent confidence to engage in digital services in places of government
  - 3x Leader in the Gartner® Magic Quadrant™ for Indoor Location Services
  - Juniper Mist is StateRAMP Authorized

- **Automates agency IT operations for efficient performance, delivering the fastest feature rollouts with zero downtime**

  Enable resilient government operations with a flexible and scalable network
  - 95% reduction in network related trouble tickets (City of Parkland)
  - Less than three-month, statewide network refresh, enabling 30,000 government employees to work remotely (State of Oklahoma)

- **Unifies comprehensive government network protection with exceptional threat detection**

 Seamlessly secure connectivity to enable agency access and information sharing
  - Juniper threat-aware network helps OIT protect the city's network and endpoints (City of Philadelphia)
 - Save up to 50% bandwidth with tunnel-free SD-WAN built on Zero Trust framework for speed and efficacy

in action**

Strategic partnerships

"Working with great partners, like Juniper Networks, OMES secured one of
Oklahoma's most valuable resources - 2.6 million gigabytes of data."

State of OK - OMES

People experiences

"Juniper and Mist AI are helping us build the network of the future. Now we are
connecting platforms and realizing client-to-cloud visibility that helps us deliver
amazing user experiences."

Service Now

Process automation

"We run a network that supports 30,000 employees with four people, and on a
day-to-day basis, the network is run by two or three people."

City of Philadelphia

Value and efficiency

"We have saved over $1 million in operational time and effort."

CA State Agency - DWR
