AI-Native Networking

Making every constituent and agency connection count

In the public safety space, grantmakers are prioritizing projects that enhance communication among first responder agencies, decrease emergency response times, and improve data security. Juniper Networks' AI-Native Networking Platform provides public safety agencies with the technology they need to deliver experience-first constituent services. Funding is available at the state and federal levels through various competitive opportunities.

Funds are available

Sample distributions

Grant name	Annual funding	Use cases	Juniper Networks solutions
Homeland Security Grant Program (HSGP)	US $1 billion	Build capabilities to better respond to threats	Reliable networks enhance communication and coordination among first responders
Emergency Management Performance Grant	US $319.5 million	Preparedness for disasters and hazards	Networks support IoT integration to enhance data collection and community resiliency
Edward Byrne Memorial Justice Assistant Grant (JAG)	US $294 million	Funds programs and technology needs for criminal justice agencies	Secure connectivity supports quicker decision making, crucial for law enforcement agencies
